

Architects & Engineers Professional Indemnity

The work of architects and engineers is constantly under the spotlight. No matter how careful and exact an architect or engineer is, his/her work is constantly scrutinised by clients, leaving the chance of facing a complaint alleging negligence or failure to render professional services. Working in an industry that continues to feel the negative effects of the economy, architects and engineers cannot afford to take this risk – and that is where we can help.

Design professionals are faced with evolving exposures as markets emerge, organisations cross borders, technology advances, and the legal environments in which they work constantly shift. Tasked with designing and engineering the projects of tomorrow – from local schools to large scale infrastructure projects – architects and engineers need a partner that can keep pace with the opportunities for growth presented to their evolving profession.

Bespoke & Flexible Tailored Solutions

Using a civil liability form, AIG is able to build a bespoke policy tailored to your client needs.
