Helping clients resume normal operations whilst minimising the costs associated with remediation and pollution liabilities, PIER can mobilise pollution response specialists to react to incidents of all sizes – from minor spills to major and catastrophic events.

PIER can dispatch local consultants and contractors to help businesses develop remediation plans, mitigate damage, manage the public impact of the incident and begin clean-up.

PIER is accessible to AIG Environmental policyholders and the network puts clients in direct contact with recommended responders. Our clients enter into a contract with the service providers, ensuring they remain in control of the response. If the pollution incident is not covered by the policy, businesses can still benefit from AIG’s discounted rates.
